# Latinx Among 216 Scholarships to Attend the 2019 U.S. Conference on AIDS

Who got what and why? NMAC's Paul Kawata addresses criticism and breaks down the data.

August 13, 2019 By Caroline Tien

---

Latinx people accounted for 21% of the 216 people who received scholarships for this year's United States Conference on AIDS (USCA 2019). In total, 1,112 people applied for the financial awards, which help folks attend the Washington, DC, event. That means a lot of folks were turned down, disappointed and down-right upset. Those concerns were addressed in a blog post by Paul Kawata, the executive director of NMAC, formerly known as the National Minority AIDS Council, which spearheads the annual USCA. He also offered demographics on scholarship recipients.

"When you look at the demographics of who got scholarships, USCA prioritized people living with HIV and people of color, the communities hardest hit by HIV," Kawata wrote.

He further explained: "Our reviewers go online and blindly review the applications without seeing the applicants' names. Reviewers were people who work on the front lines of the epidemic and are part of the constituent advisory panels (CAPs)."

However, he acknowledges, "People are upset, and I am sorry."

In an effort to respond to the concerns that have been raised—including that some people have received scholarships multiple years—Kawata says NMAC will undertake a systematic review of the selection process, create an online evaluation form to gauge the needs of the community and add new members to the CAPs.

Regarding repeat scholars, he notes that "around 30% of the scholarships went to people who received one previously. Most of the repeats happened for the Youth Scholars. This is strategic because the agency believes it takes more than one year to build leaders."

He also reminded readers: "Many long-term leaders in our movement did not get a scholarship. Getting a scholarship is not a reflection of your value as an activist."

Three main types of scholarships are currently listed on NMAC's website (where available, you can click on the scholarship below to read the bios of this year's recipients):

- The HIV 50+ Strong & Healthy scholarship, which is awarded to roughly 50 people over 50 living with HIV;

- The ViiV Youth Initiative scholarship, which is awarded to about 30 18- to 25-year-olds with a proven passion for eliminating HIV;

- The Social Media Fellowship, which is awarded to roughly 18 influencers who use their online platforms to showcase the lived experiences of people with HIV.

In addition, Kawata said, 15 scholarships were reserved for people taking Truvada as pre-exposure prophylaxis (PrEP).

According to the NMAC blog post, here's a breakdown of scholarship recipient demographics:

HIV Status

- Positive – 57%
- Negative – 34%
- On PrEP – 5%
- Undeclared/Unknown/No Answer – 6%

Ethnicity

- African American/Black – 54%
- Latinx – 21%
- Caucasian/White – 14%
- Asian – 4%
- American Indian and Alaska Native/Native Hawaiian and Pacific Islander – 5%
- Not Disclosed/No Answer – 2%

Gender/Gender Identity

- Male – 53%
- Female –33%
- MTF or Trans Woman – 8%
- FTM or Trans Man – 1%
- Gender Queer/Androgynous – 2%
- No Answer – 2%

Collectively, NMAC partner organizations such as the Indian Health Service, Latino Commission on AIDS, National Black Gay Men's Advocacy Coalition, Positive Women's Network–USA, Transgender

Law Center and Black Women's Health Imperative awarded another 400 scholarships.

Interested in learning more about USCA 2019 and this year's main theme? (Hint: It has something to do with Trump's plan to end HIV in America.) You can read a summary of the itinerary here.
