

3rd World Congress on Nanotechnology

Scitechseries warmly welcomes you to the "[3rd World Congress on Nanotechnology](#)" (Nano 2026), scheduled to take place in Berlin, Germany, from October 29-30, 2026 (Hybrid Event).

This conference will be held under the theme **“Shaping the Future through Advanced Nanomaterials and Smart Innovations.”**

[Nano 2026](#) serves as a global platform bringing together leading scientists, researchers, academicians, engineers, and industry professionals to exchange the latest breakthroughs and advancements in nanoscience and nanotechnology. The congress will explore emerging trends, applications, and future prospects across diverse sectors, including medicine, energy, materials, environment, and electronics. The two-day event features highly esteemed keynote addresses, interactive panel discussions, oral and poster presentations, and an engaging exhibition showcasing the latest technological innovations in nanotechnology. It aims to provide a collaborative environment for sharing knowledge, fostering new research partnerships, and advancing the frontiers of nanoscale science.

Join us at [Nano 2026](#) to be part of this inspiring gathering that continues to shape the global landscape of Nanotechnology, Nanomaterials, and Nanoengineering.

When	October 29 - October 30, 2026
Location	Hans Grade Allee 5 Schönefeld Bei, 12529 Berlin Germany
Venue	Holiday Inn Berlin Airport - Conference Centre
